PROFESSIONAL EXPERIENCE

AMD, Iasi Romania, Software Engineer Intern

1 Jun 2024 - 30 Sep 2024

- Keyword: System Design, Kotlin, Spring Boot, React, Docker, Linux, Nginx

The team faced low productivity due to the manual handling of thousands of regressions through crontab. To address this, I developed a microservices-based web application that streamlined regression management. It featured action tracking, regressions versioning and a well-defined flow for consistent database synchronization. This setup enabled precise detection of changes made through the user interface or directly on the crontab servers. As a result, team productivity increased significantly, and regression management became much more efficient.

Continental, Iasi Romania, DevOps Engineer Intern

15 Jul 2023 – 9 Feb 2024

- Keyword: Software Design, Groovy, Jenkins, Python, Kubernetes, Docker, Linux, AWS

To address the rising demand for CI build efficiency, I gathered the team to tackle the challenges in managing build resources. I then developed a Jenkins Shared Library to enhance CI builds performance and streamline resource management. This involved extracting logic from legacy scripts, integrating new logic, and designing a state machine using OOP principles. Consequently, there was a noticeable improvement in CI builds efficiency across the entire development workflow. Furthermore, the solution improved resource management and facilitated smooth integration with various cloud providers.

SKILLS

- ★ Languages: English(advanced), Romania(native)
- ★ Architecture: System/Software/Algorithm Design, UML, OOP
- ★ Engineering: Data Structures, Analytical Thinking, Problem Solving
- ★ Development Tools: Ktor, Spring, ASP.NET, Flask, React
- ★ Orchestration Tools: Kubernetes, Lens, Docker Swarm, Portainer
- ★ Messaging Brokers: Kafka, RabbitMQ
- ★ Programming Languages: Kotlin, Python, Groovy, Java, C#, JavaScript, Bash
- ★ Cloud: AWS (API Gateway, Lambda, EC2, CodeCommit, CloudTrail)
- ★ Other Tools: Docker, Docker Compose, Linux, Jenkins, Nginx, Git

PERSONAL PROJECTS

- | | |
|--|----------------------------|
| 🔗 <u>Online Book Shop</u> : clean architecture, clean code, layered monolith, teamwork | <u>Apr 2024 - Jun 2024</u> |
| 🔗 <u>Share Drive CLI</u> : component-based architecture, client-server, Coap RFC | <u>Nov 2023 - Jan 2024</u> |
| 🔗 <u>Nvidia GPU Manager</u> : bash scripting, topic-based research | <u>Oct 2023 - Oct 2023</u> |
| 🔗 <u>Cyberpunk Platformer</u> : fine-grained granularity, complex oop design | <u>Mar 2023 - May 2023</u> |

EDUCATION + AWARDS

- | | |
|---|---------------------------------------|
| ✓ Gheorghe Asachi University, Iasi Romania
bachelor's degree in automatic control and computer engineering | <u>Graduation</u>
<u>Year 2025</u> |
| ★ Amazon Learn&Earn: OOP | <u>Year 2023</u> |
| ★ Amazon Learn&Earn: Data Structures | <u>Year 2022</u> |
